The Verdict: A rich Chocolate Malt Whisky - has to be one of the most requested bottles we have here at the bar. It has many different uses, from a great adult night in with a (big) glass of Whisky (like our Malt Whiskey Extreme tasting flight). It also has an awesome feel when you are on your own.1. Field of the Invention The present invention relates to a camera having a print film system, and more particularly, it relates to a camera having a print film system, in which a print film including a plurality of frames is taken, a predetermined frame is selected from the plurality of frames, this selected frame is subjected to a photographing operation with a conventional camera and an image of the selected frame is printed. 2. Description of the Background Art A printer to which a print film including a plurality of frames can be loaded, is generally constructed to print on the print film a photograph of a subject which is taken by a camera. The printer also prints some information, such as the date of photographing, a title of the photographed subject and the like on the print film. With a printer capable of printing alphanumerical and/or graphic information at a desired position of the print film in addition to the print photographing, the printer is often used as a photo printing system for a conventional camera having the print film system. For example, Japanese Laying-open Utility Model Publication No. 56-76822 proposes a camera having a print film system. In this camera, a shutter is operated to take a print film, and the print film is loaded in the camera. During the loading, it is checked whether or not the print film is inserted in a predetermined position in the camera. If the print film is not located in the predetermined position in the camera, the print film is removed from the camera
